Which one of the following statement is true: (a). A deliverable is a software process which can be given to the end users (b). Software engineering is an engineering discipline which is concerned with all aspects of software production (c). The size of software is increasing with time (d). Program is a superset of software

- ☐ b and c
- ☐ b and d
- ☐ a and b
- ☐ c and d

The phases in waterfall model

- ☐ Maybe sequential or parallel depending on the type of project
- ☐ Are overlapping
- ☐ Are always sequential
- ☐ Are always parallel

Which one of the following is not a characteristic of software:

- ☐ Software gets outdated
- ☐ Software is not flexible
- ☐ Software is not manufactured
- ☐ Software has a burn-in phase

Which one of the following is true about hardware:

- ☐ Hardware becomes outdated after some time
- ☐ Hardware is flexible
- ☐ Hardware is manufactured

Which one of the following are product metrics (a). reliability (b). Quality (c). Complexity (d). Productivity

- ☐ a and c
- ☐ none of these
- ☐ only a
- ☐ all of these

Milestones are very essential to

- ☐ know user expectations
- ☐ none of the above
- ☐ know the cost of the project
- ☐ know the status of the project

Iterative model has the same phases as

- ☐ Incremental model
- ☐ Option 4
- ☐ Build and fix model
- ☐ Waterfall model

Following is not a part of operating procedure manuals?

- ☐ User manuals
- ☐ Documentation manuals
- ☐ Installation manuals
- ☐ Operational manuals

Why does hardware wear out? (a) Friction between different components , (b)Dust and other environment changes, (c) Customer demands for new hardware, (d) Customer feels that hardware has become outdated

- ☐ a
- ☐ all of he above
- ☐ a and c
- ☐ a and b
- ☐ a, b and d

User's participation is essential in which of the following models:

- ☐ Iterative
- ☐ Waterfall
- ☐ Build and Fix
- ☐ Rapid Application development

Generic software products are all except

- ☐ Android operating systems
- ☐ Software developed for an e-commerce organization
- ☐ Weather forecasting software
- ☐ MS Office

How many phases are there in build and fix model

- ☐ 0
- ☐ 1
- ☐ 3
- ☐ 2

RAD stands for

- ☐ Relative application development
- ☐ Repeated application development
- ☐ Rapid application development
- ☐ Ready application development

For small software programs developed by students in laboratories, which one of the model is most suited:

- ☐ RAD
- ☐ Build and fix
- ☐ Waterfall
- ☐ Iterative

Software module is defined as a:

- ☐ Function
- ☐ Procedure
- ☐ Sub program
- ☐ All of the above
